

9TH BIENNALE OF YOUNG GREEK ARCHITECTS: THE CONFERENCE

The **Hellenic Institute of Architecture** co-organizes with the **Benaki Museum** a Conference in the context of the *9th Biennale of Young Greek Architects* on November the 2nd 2018 at the Auditorium of the Benaki Museum/ Piraeus 138. **ek magazine** is the strategic partner of the Conference.

The conference will have two sessions: in the first session of sponsors, young architects will present their works, while in the second session the members of the jury will discuss with young architects whose work has been distinguished in the Biennale.

The aim of this event, as well as others to follow in 2018-2019, is to give an opportunity to young architects to present their architectural approach in the contemporary context. EIA aspires in this way to contribute to a dialogue on architecture and the city by tracing the thoughts of young creators.
